

ACTION STRATEGY EXAMPLE

The Swinomish Tribe utilizes a planning matrix for climate change impacts that look at near and long-term goals to achieve the identified potential adaptation strategies.

CLIMATE CHANGE IMPACT	POTENTIAL ADAPTATION STRATEGY	STATUS TO DATE	1 YEAR GOAL(S)	5 YEAR GOAL(S)
Inundation of tideland and marine habitat; loss of forage and spawning for fish and waterfowl	Incentives to relocate	No actions	Study re: to Sneeoosh	Apply if useful and funding available
	Diking/armoring	Ongoing efforts to minimize hard armor	Complete SSA code update re: tightening rules	Continue implementing tighter rules
	Development restriction/setbacks	Draft code update includes setback change for marine bluff and SLR risk zones	Complete SSA code update	Continue implementing new rules
	Fill addition/removal to maintain	Completed several fill removal; fill pjr	Resoration of Kukutali tombolo by fill removal and fill	1-2 new pocket estuary sites
